

Empowering Communities, Nurturing Lives

Fresenius Kabi Canada: Partners in Health with HPIC for 15 years

Since 2008, Fresenius Kabi Canada has partnered with Health Partners International Canada (HPIC) in a mission to provide essential medicines to those in need. To date, Fresenius Kabi Canada has provided \$5 million in medicines to support communities in 26 countries, including Lebanon, Ukraine, Ghana, and more.

Nurturing New Beginnings in Lebanon: HPIC's NeoLife Project

Each year in Lebanon, 18,000 babies are born preterm and need to be admitted to a Neonatal Intensive Care Unit (NICU); but in a country that lacks adequate facilities, equipment, medicine, and medical supplies, many of these newborns are unable to receive treatment. Fresenius Kabi Canada's most recent donation supports HPIC's NeoLife Project in Beirut Karantina Hospital and Tripoli Governmental Hospital, giving these fragile infants the chance they deserve. Together we are providing health but also renewing hope for hospital staff, and the parents of these patients.

"Knowing that HPIC has the trust and support of partners like Fresenius Kabi, to provide support for patients of all ages is truly remarkable. I have nothing but a heart full of gratitude knowing that no parent will ever be turned away because they can't afford medicines, healthcare or treatment for their premature son or daughter. We have a duty to care for life and those most vulnerable and that duty is being fulfilled. Health is everything – that is where life truly begins"

-Lois Brown, President at HPIC
