**Oxytocin Injection, USP Synthetic 10 USP units/mL SD Vial 1 mL and MD Vial 10mL  
Backorder and Short-Dated Notification**

Dear Valued Customer,

Fresenius Kabi Canada regrets to advise that due to production delays, we are anticipating a supply interruption on **Oxytocin Injection, USP Synthetic 10 USP units/mL SD Vial 1 mL** effective **October 1, 2022 to January 2, 2023**.

Our **1 mL vial** will remain on 100% allocation for contracted customers until the end of September (based on historical demand). **Effective October 1, 2022**, allocations will then be **reduced to 50%**. Effective November 1, 2022, it is anticipated that our 1 mL will be on backorder as all inventory will have been depleted.

Pfizer is an alternate supplier of Oxytocin Injection Synthetic 10 units/mL 1 mL and they have been notified of our potential shortage. Pfizer has indicated that they have **limited inventory of their 1 mL ampoule** available and would **only be in a position to cover 50% of our monthly demand** during our shortage.

Our **Oxytocin Injection, USP Synthetic 10 USP units/mL MD Vial 10 mL** will be available with no restrictions until the end of September; however, all available inventory expires September 30, 2022. Due to the impending market shortage of 1mL vials we strongly encourage customers to use this short-dated inventory until expiry in effort to help conserve as much Oxytocin as possible. A limited quantity of 10mL with an expiry date of January 31, 2023 will then be available by October 1, 2022 and will be placed on 100% allocation. Contract customers will be allocated 100% of 10mL historical monthly demand with no coverage of 1mL possible. We anticipate fresh inventory of 10mL to be available by January 2, 2023.

The critical nature of this product is well understood and all efforts are being made to expedite production and mitigate this shortage. We will advise of any updates should there be improvements to the timelines indicated above. **In the interim, we encourage all customers to use severe conservation measures across all formats of Oxytocin to extend the supply as long as possible.**

DIN	Fresenius Kabi Product Code	MDP Product Code	Product Description	Supply Status Aug. & Sep. 2022	Supply Status Oct. 2022	Supply Status Nov. & Dec. 2022
02139561	C912011	975965	Oxytocin Injection, USP Synthetic 10 USP units/mL SD Vial 1 mL	100% Allocation	50% Allocation	Backorder Availability date: Jan. 2, 2023
02139561	C1210	922626	Oxytocin Injection, USP Synthetic 10 USP units/mL MD Vial 10 mL	Short-dated inventory available with no restrictions. (Inventory expires Sep. 30, 2022)	100% Allocation of 10mL demand with no coverage of 1mL. (Inventory expires Jan. 31, 2023)	100% Allocation of 10mL demand with no coverage of 1mL. (Inventory expires Jan. 31, 2023)

We recognize the difficulties and inconvenience that you may encounter as a result of our supply interruption, and we thank you for your patience and understanding in this matter.

If you have any questions or concerns, please do not hesitate to contact customer service at (877) 821-7724.

Sincerely,

Vishakha Patel
